Biography

Dr Alessandro Raimondo worked for several physics experiments before joining CERN in 1999. There, he was first responsible for the supervision and control system of the prototype of the Large Hadron Collider (LHC) full-cell, then for the measurement and control systems for the LHC magnets test facilities. His latest assignment was as Customer Relationship Manager in charge of the service maturity assessment and improvement, based on the ISO20K standard.

Dr Raimondo graduated from Torino University where he also obtained his PhD in physics in 1997. More recently, in 2016, he obtained his EMBA from Marconi University in Rome.

He is member of the Pensions Management Institute, the Chartered Institute for Securities & Investment and The Institute of Internal Auditors.
